APP CRITIQUE

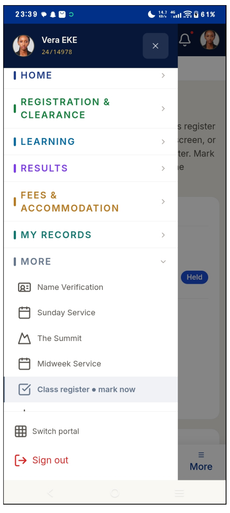

It is difficult to locate the student portal because some of the navigation text is small.

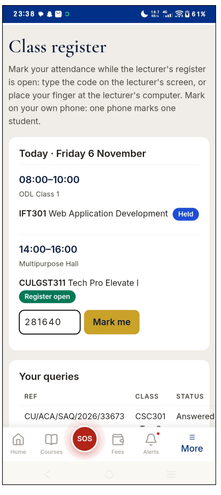

The navigation buttons sometimes take a while to load.

Anyone who knows my name and matric number may be able to access my student portal.

It can be difficult to navigate through the portal to find the features i need.

When the network connection is weak, registering attendance becomes more difficult.

CRITERION	QUESTIONS TO ASK	RATING	COMMENT
CLARITY	is it obvious what each screen is for and what to do next?	3/5	Some navigation options are difficult to locate
EFFICIENCY	How many steps and taps did the task take? could it be fewer?	2/5	Several steps are required to access results and attendance
CONSISTENCY	Do buttons , colours and wording behave the same way across screens?	4/5	Colours, buttons and layout are fairly consistent
ERROR HANDLING	What happens when something goes wrong? Are messages helpful?	1/5	Error messages provide little guidance.
READABILITY	Is text large enough and does it have good contrast?	3/5	Some text sizes could be improved.
OVERALL FEELING	Did it feel trustworthy and pleasant to use?	4/5	More visually appealing than the old portal.

TWO THINGS THE APP DOES WELL

1.It centralizes essential student data (results ,status, fee, course) in one single platform.
2.Layout is consistent even on different forms of devices and its pleasant to use and a bit organized.

THINGS THAT NEED IMPROVEMENT

1. Navigation: It is not very easy to locate the student portal, and accessing important information such as results and attendance requires several steps. The navigation should be simplified, with frequently used features made more accessible.

2. Error handling: The portal does not provide helpful feedback when something goes wrong. Instead, it may redirect users automatically or display generic messages such as "No network" or "You are offline". It should provide clearer error messages and guidance on what users can do next.

BIGGEST FINDINGS:

My biggest finding is mainly a UX issue because navigating the portal and accessing important information can be difficult and time consuming, even though its general appearance is pleasant.

PROJECT BRIEF

Application Name: Caleb University Portal

Application Type: Educational / Student Management Application

Description:

The Caleb University Portal is an online platform designed to help students access and manage their academic information and other university related activities as well as staffs(lecturers).

The platform allows students to perform tasks such as checking their results, viewing course information, monitoring attendance, managing school fees and accommodation information, and receiving university announcements.

Its main purpose is to make academic and administrative services more accessible to students without requiring them to visit different university offices for every task.
